

Comparative Studies of Country

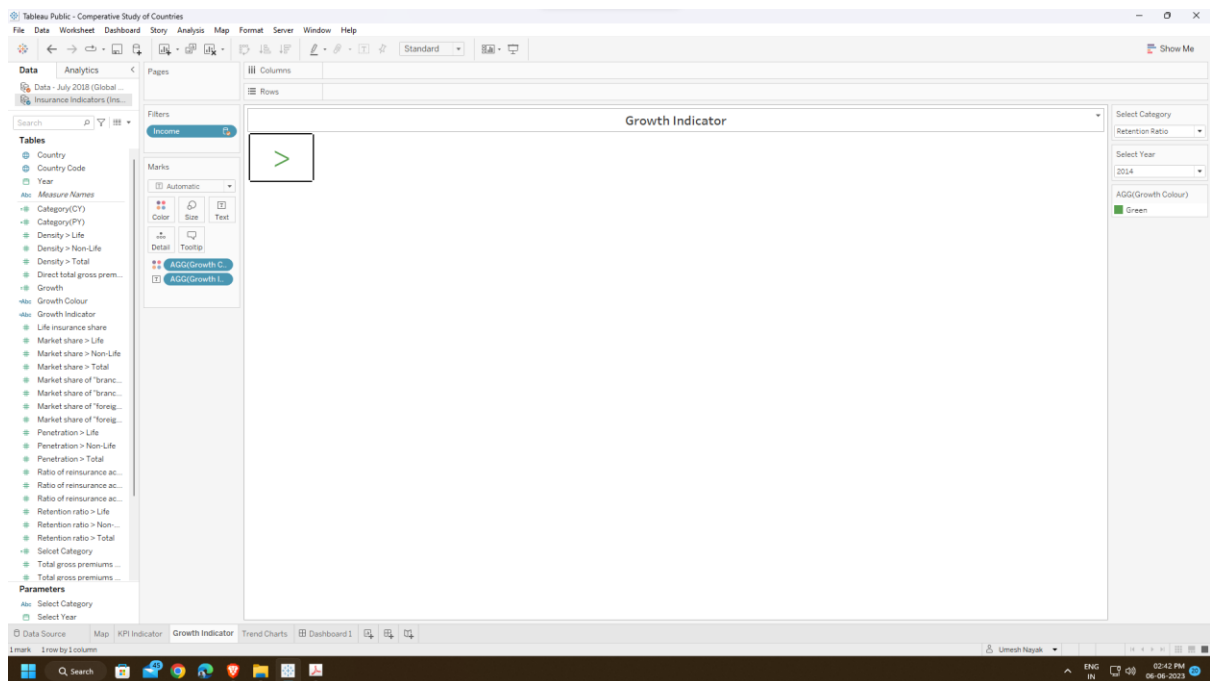

- Create a geographic map showing the countries' fields. Colour the map based on the income column from the secondary dataset.

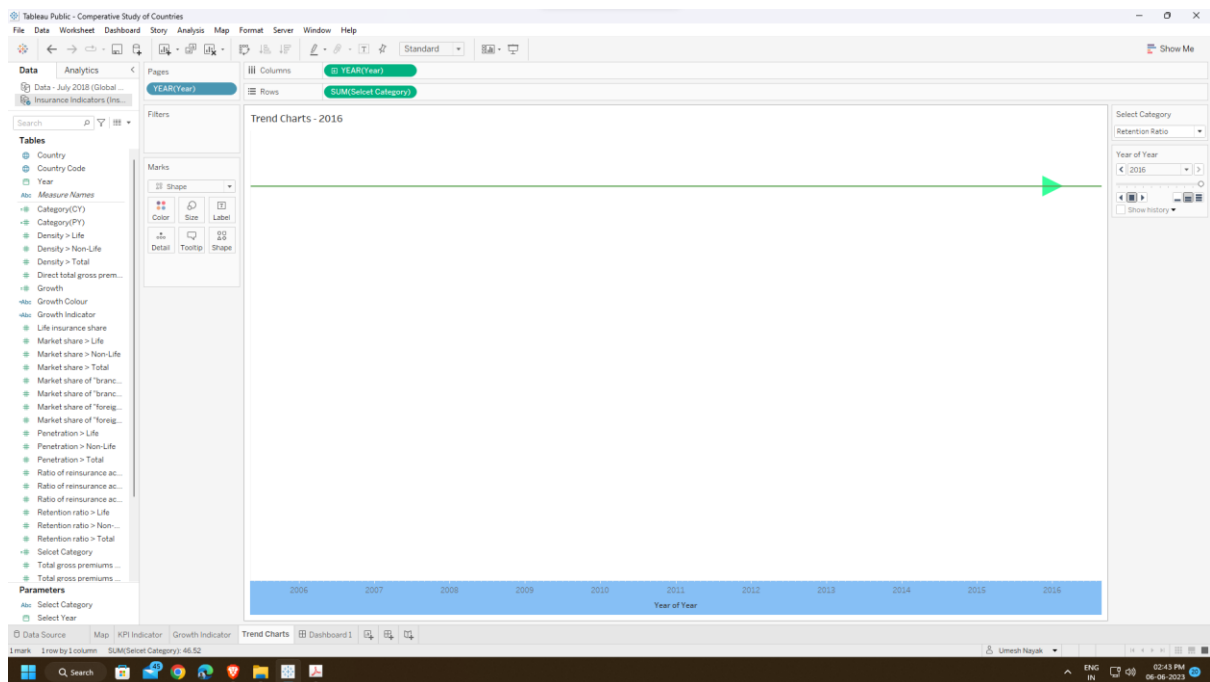

- Create a KPI Table to show the comparison between the selected period and the period prior to the selected one.

- Create Growth Indicator Shapes based on the Growth %

- Create a trend line to show the selected category values

- Create a dashboard filter for income group to be applied for all charts with the filter action enabled in the map as well
